

Dear Parents/ Carers,

Sapphire Class have begun designing their night lights as part of our project 'Who's Afraid of the Dark?'. Your child will need to gather recycled materials to build their light from. Now that your child has created their design in class they will know the types of materials they will need to build their light. All electrical components, the bulb itself, batteries and switches are provided by the school. Can all building materials please come into Sapphire Class on Thursday 5th December ready for our DT lesson that day. Please speak to Mrs Bishop or Mrs Hagan if you are unable to gather any materials- Mrs Bishop has been collecting some materials that pupils can also use.

With kind regards

Mrs Hagan and Mrs Bishop
